

## Environmental Certification for the Olympic Municipalities and the Mountain Community Alta Val Susa

During the last months of 2005, the Olympic Municipalities of **Bardonecchia, Claviere, Oulx, Pragelato, Sauze di Cesana, Sauze d'Oulx, Sestriere** and the **Mountain Community Alta Valle Susa** have reached the important goal of the **Environmental Management Certification ISO 14001**, in the framework of a project, supported by the Province of Turin and financed by Piedmont Region.

This project started in October 2003 with the subscription of the Province of Turin, the Mountain Community Alta Valle Susa, the Olympic Municipalities, the Forestry Consortium Alta Valle Susa, CIPRA Italia, TOROC and the Committee Ecolabel-Ecoaudit, with the Environment Park's technical support.

Thanks to this initiative, promoted to leave a positive inheritance for the territory in the post-Olympic period, the Administrations have adopted a management tool to improve the environmental quality of the territory and the efficiency in management and prevention of the environmental problems, through the control of the quality and the communication to the interested parties.
